ISG Recognizes Cigniti as 'Leader' in Continuous Testing for the US Market

Business Wire

DALLAS -- November 10, 2022

Cigniti Technologies, the world's leading AI & IP-led Digital Assurance and Digital Engineering services company, has been recognized as a 'Leader' in ISG's Provider Lens™ report for 2022 Next-Gen Application Development and Maintenance (ADM) Services, Oct 2022. The recognition comes in the category of Continuous Testing Specialists.

"Continuous testing services ensure the right quality at speed in the Business 4.0 era, which is characterized by the widespread adoption of Agile and DevOps. This enables organizations to deliver superior customer experiences to retain customer loyalty and expand the business. We believe that our repeated ranking as a Leader in this report is a resounding endorsement of our strategy, solid capabilities, and innovative and ground-breaking solutions. Our promise to our customers that a quality-first approach leads to a successful digital transformation through continuous testing, digital assurance, and automation gets a further boost with this recognition," said Srikanth Chakkilam, CEO of Cigniti.

"To develop new IP-based products like AI-led test data management, test environment management, and security engineering, we continue to aggressively invest in our IP, BlueSwan™," added Srikanth.

Sairam Vedam, CMO at Cigniti, said, "This positioning by ISG demonstrates our progressive investments in IP-led automation-oriented continuous testing services. We help our customers in delivering great experiences quickly and mitigate business risks thanks to our extensive portfolio of intellectual property and solutions, deep contextual and subject expertise, and customer-centricity."

"As per the ISG report, 'Continuous, highly automated, end-to-end testing, supported by AI and machine learning, will increase and, in some cases, supersede the "shift right" and "shift left" trends that are already evident among providers and clients.' This further affirms our belief that Digital Assurance Automation and Continuous Testing are the cornerstones and bedrock of modern-day enterprise digital transformation as global companies race to be digital-first," Sairam added.

Michael Dortch, Lead Analyst of the study said, "Enterprises across the U.S. vary considerably in size, primary lines of business, and digital maturity. However, almost all such enterprises need strong, agile partners to pursue, accelerate, and succeed with their digital transformation efforts. Effective testing is a critical element of those efforts. Cigniti combines modern technologies, deep experience, solid IP, and strong partnerships to deliver the solutions and support its enterprise clients need to succeed."

Effective testing is a critical element of those efforts. Cigniti combines modern technologies, deep experience, solid IP, and strong partnerships to deliver the solutions and support its enterprise clients need to succeed."

Key strengths of Cigniti are highlighted in the report are:

BlueSwan™ in flight: Cigniti's BlueSwan™ platform includes eight modules that deliver functions ranging from AI-powered, script-less test automation (iNSta™); predictive dashboards (Verita™); and integrated test asset migration to process acceleration and quality engineering support. The platform combines Cigniti's IP and its deep domain expertise gained from more than 20 years of testing solution development and delivery.

Focus on testing: Cigniti offers testing and assurance services for a broad range of enterprise solutions, applications, and technologies. Examples include DevOps; ERP; Salesforce and security training; testing and assurance for AI, big data and analytics, IoT, blockchain, and cloud migration.

Partner power: Cigniti has strong industry partnerships with companies ranging from hyperscalers such as AWS and Microsoft to specialists and experts in software testing (Tricentis), RPA (UiPath), DevOps (Broadcom), and other technologies and areas. These partnerships complement Cigniti's significant organic IP and broaden its ability to deliver
